

## Program (Steve Haddix)

### April 11, 2019 – Barbara Dill – multi-axis cup

Barbara Dill left the nursing profession in 1989 to become a professional woodworker. Beginning with a class at *Arrowmont* with Mike Hosaluk, she has now become a full-time turner, teacher, and author. She was always fascinated with the adventures of multi-axis spindle turning, and it became her focus in 2006. She teaches via a self-derived conceptual model that helps clarify the tools, techniques, and results and makes them predictable and repeatable. (See [www.barbaradill.com](http://www.barbaradill.com) )

Barbara has demonstrated for us twice in the past, and she is looking forward to coming back. She plans to show how the model can be used to discover forms. She will take a simple form and show how new forms can be discovered by using identified variables inherent in multi-axis spindle turning. Her goal is to show how to make the conceptual model come alive. She will then create a multi-axis cup, demonstrating a systematic process. She sounds more like an engineer than a nurse to me!

Barbara enjoys teaching and sharing her knowledge. She has made an instructional DVD that is on her YouTube channel, has recently authored a book loaded with drawings, photos, and information, and has published a number of articles in the *American Woodturner* (Fall and Winter of 2007, February, 2010, December of 2011, and October, 2013). She was an Emerging Artist at the 2011 National Symposium (St. Paul, MN) and has demonstrated at SWAT in Texas, the Appalachian Center for Craft, Arrowmont, The Center for Furniture Craftsmanship, and at AAW symposiums, as well as turning clubs, such as ours, in many states and in Canada.
